

Here's what's best:

- Highly scratch-proof paint
- Complete ESD compatibility is retained
- Connector color complements the aluminum frame

The following designLINE components are available:

- Bracket
- Cube connector, T-connector and end connector
- 45° connector
- Swivel bearing
- Joints, support arm joints, bearing pedestal

All connectors are delivered complete with mounting hardware.

**designLINE – A
Connection of Quality and
Performance with Appeal**

The new stars in Rexroth's modular profile system

Rexroth's proven standard connectors in our modular profile system have undergone a fundamental facelift. The designLINE versions make their mark with an optically pleasing high-quality appearance, which seamlessly matches the aluminum frame. Surface treatment with a special silver paint achieves this effect.

Painted brackets and smoothly sealed profiles – secure, clean, visually appealing

Left:
Aesthetically perfect – as this before and after comparison shows.

Below:
Easy on the eyes – staircase with designLINE brackets and cube connectors

Everything you need – in the Rexroth modular profile system

Components you can use anywhere, exactly matched to each other and easy to assemble. The fastest, easiest way to complete any structure: frames, enclosures, workstations, and much more. What makes our modular profile system the most successful worldwide:

- User-friendly bolted connections
- Complete ESD capability
- System compatibility for all profile sizes
- Comprehensive offering of accessories
- Free 3-D planning software
